HIGHLAND UNIVERSITY.

This institution is the outgrowth of the Iowa and Sac Mission, which was commenced by Rev. S. M. Irvin in 1837, in company with Rev. William Hamilton, under the direction of the Presbyterian Board of Foreign Missions. In 1856 the Indians were removed to a reservation in Nebraska, the village of Highland was located, the Indian school transferred to that place and the Indian church became the church of Highland. In this year a classical academy was begun. In 1858 a charter was obtained under the title of Highland University and several years afterward the institution was transferred to the care of the Synod of Kansas, which body still elect its Trustees. The object of the college is to give a complete and thorough training in all those branches of study which will best develop the highest mental and moral manhood. But not to be untrue to the aim of its founders the school desires particularly to train those whose purpose is to spread the Gospel in the world. The institution, while under the control of a particular denomination, is in no sense sectarian. Several religious denominations are represented on its board of Trustees. Its advantages may be shared by all students alike without interference with religious belief or personal conviction.

ENDOWMENT.

\$25.00 will purchase an annual Tuition Scholarship.

\$500.00 will endow or purchase a perpetual Tuition Scholarship.

\$2,500.00 will endow a full Scholarship, (Board and Tuition).

\$25,000.00 will endow a Professor's chair.

Through the liberality of Hon. J. P. Johnson of Highland and the citizens of Highland, the University has now two endowments. There is a strong expectation that two more will be secured provided the institution obtains a new building.

A NEW HALL.

There is no greater need of the institution to-day than another building. So pressing is this need that the Board and friends of the school feel that it must come and speedily or no considerable advancement to the college will be secured. This building, it is proposed to call, S. M. Irvin Memorial Hall, the cost to be \$25,000.00. The project meets the hearty approval of both Synod and Presbytery. Synod passed the following: "Synod expresses its hearty appreciation of what has been done by Hon. J. P. Johnson and the citizens of Highland for Christian education, and would call the attention of friends and admirers of Father Irvin and Highland University to the appeal above noted for a Memorial Hall to bear his name, and

recommends a liberal response." Presbytery took the following action: "*Resolved*, 1st, That the Presbytery of Highland does all in its power to raise money for the erection of an S. M. Irvin Memorial Hall for Highland University. 2nd, That a committee be appointed to canvass the Presbytery to see what amount can be raised for this purpose." This committee proposes soon to make a vigorous effort in this direction. Any gifts toward this object may be sent to the chairman of the committee, the President of the College.

GENERAL INFORMATION.

DEPARTMENTS.

There are three general departments, the Collegiate, the Academic and the Preparatory.

COURSES OF STUDY.

There are three full collegiate courses, Classical, Scientific and Literary, each of which occupies four years.

The Classical Course includes a thorough training in English, Latin, Greek, Mathematics, History, and Natural, Mental and Moral Sciences. It aims to develop and discipline the mind, and gives a sound foundation for any line of professional or business work.

The Scientific Course takes German instead of Greek and gives special attention to advanced studies in Natural Science and applied Mathematics. This course will be especially useful to those expecting to take up some branch of Mechanics or Civil Engineering.

The Literary Course takes German instead of Greek, French instead of Latin after Virgil, and gives special attention to Rhetoric, Literature and Composition.

The degree of A. B. will be conferred on those who complete the Classical Course, the degree of B. S. on those who complete the Scientific Course, and the degree of Lit. B. on those finishing the Literary Course. The degree of Master of Arts or Master of Science will be conferred upon graduates of three years standing who make application, provided they have been engaged in literary pursuits, during said three years.

THE ACADEMY.

There are three courses, The Complete, occupying three years, Teachers and Business Courses, each requiring two years.

The Complete Course occupies three years and may be Classical, Scientific or Literary, according as Greek or German is pursued. Students well advanced in common school studies may finish it in one or two years. It prepares students for the College courses, and for thorough work in business or teaching.

The Normal Course includes the first two years of the Academy, substituting, if desired, Rhetoric and Botany for Latin and giving special attention to theory and practice of teaching. This includes all branches ordinarily required for a first grade certificate in Missouri or Kansas. German or Latin, or both, may be taken in this course, also Geometry, if desired. Latin is recommended to all, as it is taught more and more in our public schools, thus creating a demand for those who can teach it.

The Business Course occupies two years, substituting German for Latin, and giving special prominence to Penmanship, Practical Arithmetic and Book-keeping. Students who are thorough in all the common school branches, can complete this or the Normal course in one year by earnest application, but they are advised to come at least a second year, if possible, and finish the Academic course.

Special studies may occasionally be accepted by the Faculty, as equivalent for others of like grade and disciplinary value, in any course, particularly in the higher classes, but preference is always given to the regular courses.

Diplomas are given to those who finish the Complete Academic, Normal or Business Courses. Graduates in these may return at any time and enter classes for the College Courses.

ADMISSION.

The school is open to both sexes and all ages alike. Any person of good, moral character and willing to render cheerful obedience to all requirements, will be admitted to any class for which the required preparation is shown. Students from other schools must give satisfactory evidence of dismissal in good standing, as it is no part of our work to encourage rebellion anywhere.

RULES.

Rules will be few and only such as can be followed by any faithful student. Absolute obedience will be required without respect of persons. Exceptions will be made only when reasons satisfactory to the Faculty are given in writing by parents or guardians.

Every student must devote at least eight hours a day, for five days in the week to study and recitation. A careful record is kept of the Department, Punctuality and Scholarship of each student, and full monthly reports will be sent to parents and guardians.

RELIGIOUS.

The spirit of the institution will be distinctly religious. While the school is under Presbyterian control, it is not sectarian in the sense of trying to influence the church preferences of any student. Every student is required to attend some church and Sunday school at least once each Sabbath, unless excused by the Faculty.

There are four churches in town—Presbyterian, Congregational, Methodist and Christian, and each student will choose for himself. Every student must own a Bible and have it present at the daily morning Chapel service and at the weekly Bible Class. Bible study will form a part of the regular work throughout the year.

Two Christian Associations, one for young men and the other for young ladies, will cordially welcome all students to their ranks and to their meetings.

The Christian influence among our students for the past has been very clear and decided. The most of this year's students are active church members, eighteen of them becoming Christians during the winter. We have no hesitation in saying openly that our most earnest desire for all the young people committed to our care, is that they may be followers of Christ and workers for Him. Our whole work rests on the Bible, and we unhesitatingly give it the first place among our text-books.

OPENING.

All students should be present on Tuesday, September 7th, if possible, as there will be a general reunion of teachers, students and friends at the University that night.

LIBRARY AND READING ROOM.

The University has a library of more than 5,000 volumes and additions are constantly being made by generous friends, for which we are always grateful. A complete set of Britannica Encyclopedia was presented recently by Rev. J. S. Ely, Xenia, Ohio. Also a set of Johnson's Cyclopedia was presented by the students.

Books may be taken out by students for reading, or for use as text-books under certain restrictions. The literary societies also have libraries of their own. A Reading Room has been arranged, comfortably furnished, and supplied with some of the leading newspapers and magazines, both religious and secular, at a slight expense to those enjoying its privileges. Friends or publishers will confer a favor by sending us any paper or periodical for this purpose, or any books for use in the library.

APPARATUS.

The Laboratory is provided with a large amount of apparatus for illustrative use in the various departments of Natural Science. Gifts for this department including minerals, fossils or other specimens, or any form of apparatus, will be gladly received from friends of the University. Our present apparatus, costing originally nearly \$1,500, has been thoroughly overhauled, refitted and re-arranged, so as to be used to much greater advantage hereafter.

MUSIC AND DRAWING.

Prof. H. L. Ainsworth, a graduate of the Neue Akademie and private pupil of the celebrated Dr. Th. Kullak of Berlin, Prussia, has devoted two days a week to giving instrumental lessons to private pupils. He is a master of instrumental and vocal music. His terms are \$1.00 per lesson for private pupils and less for class instruction.

Mrs. Maggie Morton, a student of the Chicago School of Art, has had charge of the department of drawing and painting. She is a thoroughly competent and pains-taking instructor. Price, 50 cents per lesson or \$12.00 per term of twenty-four lessons. She has also had quite a large class of beginners in instrumental music.

EXPENSES.

Tuition, College and Academy, in advance, per year \$25.00. Tuition, College and Academy, per term—Fall, \$12.00; Winter, \$10.00; Spring, \$8.00. Tuition, Preparatory Department, per year, \$24.00. Tuition, Elementary Department, in advance, per year, \$10.00; per term—Fall, \$5.00; Winter, \$4.00; Spring, \$3.00. Contingent Fee, per term, \$1.00, Elementary Department excepted. Students for the Ministry, tuition free. Children of Ministers and Missionaries, tuition half price. Reduced rates, when more than two students in the same department come from the same family.

Board, with furnished room, fuel and lights, per week, \$3.00 to \$4.00. Table board per week, \$2.50 to \$3.00. Unfurnished rooms per month, 50 cents. Plainly furnished rooms occupied by two students, per month, \$1.00. Boarding students should furnish themselves with towels and bed clothing. Young ladies from abroad will be expected to board in the Ladies' Hall under the care of a Teacher and Matron. The aggregate or necessary expenses will be from \$40 to \$70 per term, or \$120 to \$175 per year. Students who wish to reduce their expenses by work can find employment. All tuition bills must be settled at entrance.

LITERARY SOCIETIES.

There are four literary societies. The Erodelphian and Cliosopie are composed of young men; the Ateleceta and Eucleian, of young ladies. They arrange their own exercises and govern themselves, subject of course to the control of the institution. They hold sessions once a week and occasionally a public meeting. The societies have fitted up a commodious and inviting hall in the village which adds much interest to their meetings. The farewell addresses of the Seniors and responses by members chosen, together with an annual address from some orator selected for the occasion, constitute one of the pleasantest evenings of Commencement week. Mrs. St. Johns, Beloit, Kan., delivered the address this year, subject; "Know Thyself."

CHRISTIAN ASSOCIATIONS.

The Y. M. C. A. and Y. W. C. A. hold weekly meetings. These are led by one of their own number and are open to all young men and women respectively. Union missionary meetings are held by the two associations once a month. The young men have had a training class, and have done some gospel missionary work in the neighborhood. They enjoyed profitable visits from members of other associations and from State Secretaries. An annual address is delivered before the combined Associations Sabbath night of Commencement week. This year the address was given by Rev. C. E. Bradt, Lincoln, Neb., subject, "Young Man Arise." "Maid Arise."

ATHLETICS.

No college education is complete without some physical culture. The Faculty encourages all healthful out-door sports, believing that the body is as worthy of training as the mind. The College Athletic Club maintains a base ball nine, foot ball team and tennis association. The football team won a skillfully contested match game with a well-trained team of a neighboring institution. A very successful tennis tournament was held this year, which, together with the Field Day sports, added much interest to the Commencement exercises. We have splendid grounds for out-door sports, but need a good room for winter practice.

PRIZE CONTESTS.

The Oratorical Association held its second prize contest April 9th, 1891. The first prize was won by S. M. Shields; subject, "Heroes of the Past and their Influence on the Present;" the second by N. K. Hickman; subject, "Providence on the Side of the Heaviest Battalions." Mr. Shields represented the college in the state contest held in Atchison, Kansas, May 29th.

The Declamatory contest occurred June 3rd. The young ladies' prize, consisting of Etchings by American Artists, was awarded to Miss Lulu Kitzmiller. The young men's prize, Shakespeare's Works, to E. S. Shields. These prizes were the gift of John Irwin, Galesburg, Illinois.

STUDIES.

SCIENCE.

The Mental and Moral Sciences, Logic, Political Economy, History of Philosophy, belong to the President's chair, though taught this year by Prof. Bayless. Authors followed: Haven, Hickok, Jevons-Hills, Thompson, Schwegler.

In Natural Science the following authors have been pursued: Geology, Dana; Physics, Gage; Chemistry and Zoology, Steele; Botany, Wood. The Laboratory furnishes apparatus for numerous experiments in all departments. Prof. Bayless has filled this chair for four years with eminent satisfaction. He resigns, to the regret of the institution, to pursue certain lines of advanced study.

MATHEMATICS.

Our course includes Arithmetic, Algebra, Geometry, Trigonometry, Analytical Geometry and Calculus and Astronomy. Authors followed: White, Loomis, Wentworth. Prof. Bayless, who taught the higher Mathematics, has had excellent assistance in this department in Prof. D. E. Todd. The chair vacated by Prof. Bayless, will be filled by Prof. George G. Hitchcock. Mr. Hitchcock is a graduate of the University of Nebraska, took a post-graduate course at Johns Hopkins University, and has had five years experience as professor in Pierre College, Pierre, South Dakota. He comes as a genial gentleman, an earnest Christian and a successful teacher.

LATIN AND GREEK.

The English method of pronunciation is used. Prof. H. D. Herve, a most excellent classicist, thorough in his drill work and stimulating in his methods, will continue in charge of this department. Authors followed: Collar and Daniel, Kelsey, Allen and Greenough, Lord, Goodwin and White, Tyler.

GERMAN AND FRENCH.

The ordinary course is three years, when taken in place of Greek in the Scientific or Literary Course, but for others the amount is optional. Miss S. E. Geiselman, who has charge of this department, is a most careful, thorough and satisfactory instructor. Authors followed: German—Schmitz Elements, and Boisen's Prose. French—Worman.

OTHER STUDIES.

A thorough course is provided for in History and Literature. The use of the English language will receive special attention. Spelling, Grammar, Analysis, Rhetoric and Elocution are insisted on as of first importance to every student. Pedagogy is taught by Miss Geiselman, for which she is especially fitted.

ELOCUTION.

Miss A. R. Luse has given all our students weekly lessons in Elocution. Her work as a pains-taking and thoroughly competent instructor was manifest in the marked Elocutionary progress of our students in weekly rhetorical and in all public exercises. If she

does not return the coming year, we hope to provide for the Elocutionary instruction of our pupils in some other way.

BUSINESS COURSE.

It is our full purpose to furnish students, who wish to give special attention to Penmanship, Book-keeping and Commercial Law, better facilities than we have offered before. This will be looked after by some one thoroughly competent.

MUSIC.

We will afford students excellent advantages in instrumental and vocal music at reasonable rates.

PREPARATORY DEPARTMENT.

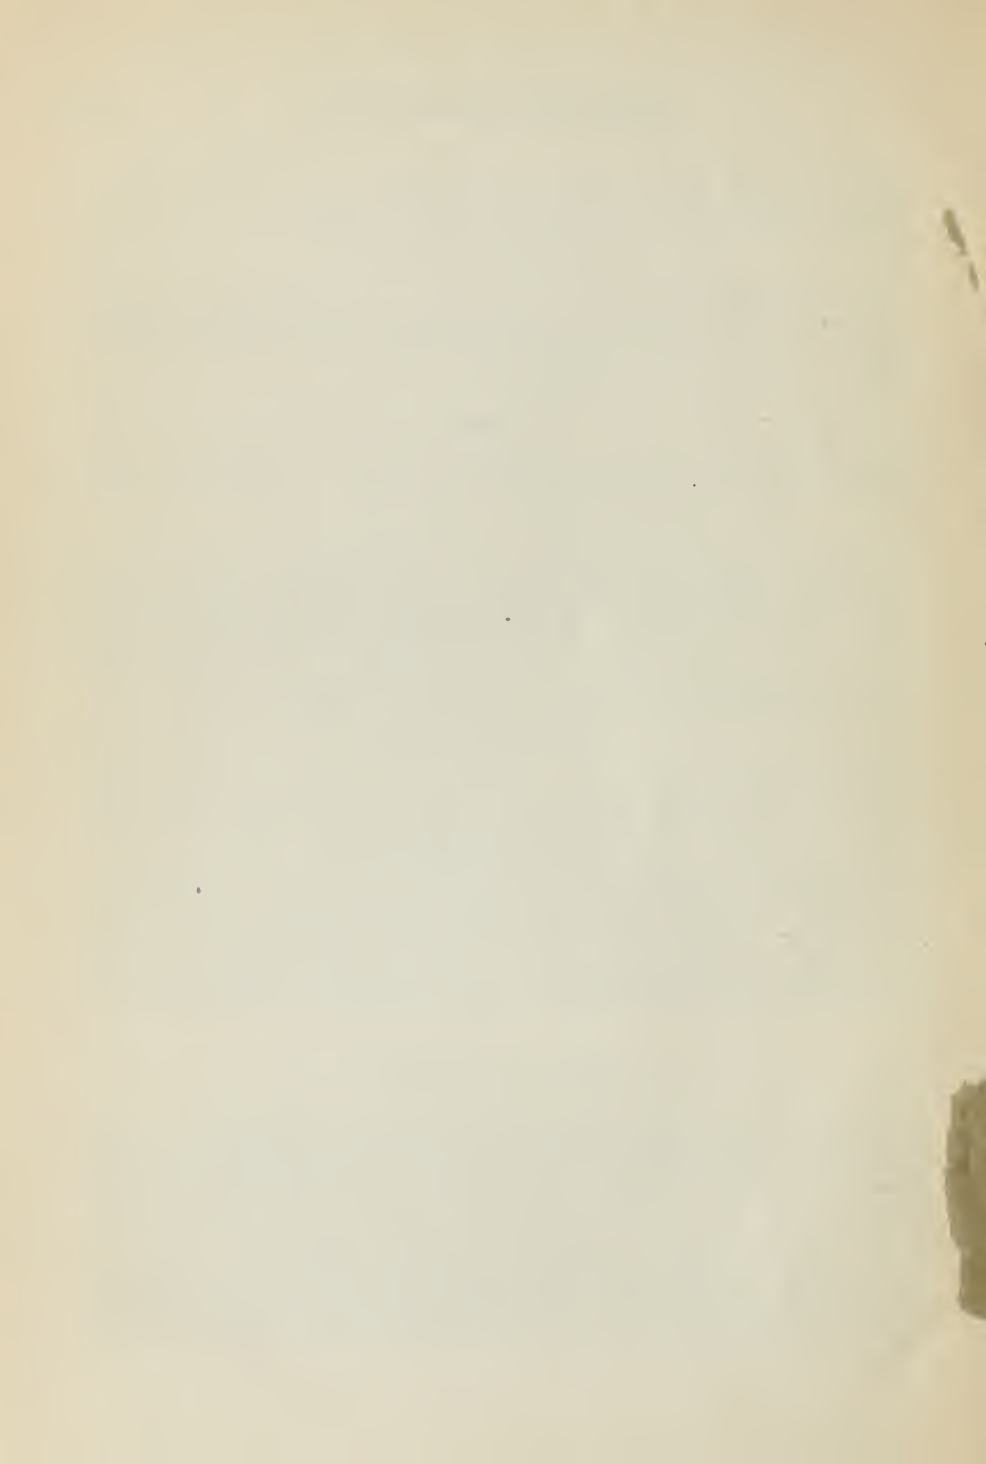

Miss Alice Rankin will preside over this department. She will be one of the regular Faculty, and her work will have the same consideration and care as the other departments of the school. For tuition rates, see elsewhere. We have uniformly found that students coming up from our Elementary Department are better trained for advanced studies than those coming in from without.

EXAMINATIONS.

Public examinations, oral, or written, will be held September 8th, for students desiring admittance to any of the classes. We have adopted a system of grading that has made a great difference in our term examinations. If a student's average grade for the term exceeds or equals 90 per cent he is not required to be examined in that study. If it fall below 90 but not below 75 he must undergo a written examination. If his grade fall below 75 or his examination marks fall below 75 he must go into the next lower class. This plan has so stimulated our students that the grades have been steadily rising.

LOCATION.

Highland is a small town, situated on the high, rolling prairie lands of North-eastern Kansas, and noted for its healthfulness and beauty. Its society is moulded by the educational influences of the University. It lies midway between two railroads—the Atchison and Nebraska on the east, and the St. Joseph and Grand Island on the south. Students can come via Atchison or Lincoln to Highland Station on the A & N., or via Hiawatha or St. Joseph to Severance, on the St. J. & G. I. Hacks for Highland meet all mail trains at either place. Severance is six miles south. Highland Station is four miles east. Dentonville on the Rock Island (C. K. & N.) R. R., is three miles south of Severance, to which conveyances will run when desired. We confidently expect that the B. & M. R. R., will soon pass through Highland.
